

(syllabus) – [tango]

Math 111 – CRN 10641 – FALL 2016 – Course ID: mock18115

(CLASS INFO)

Day/Time: MTRF/9:00pm – 9:50pm
Room: NS 215
Instructor: Chris Mock

(CONTACT INFO)

Office: Maaske 305
Phone: 503-838-9710
e-mail: mockc@wou.edu
Website: www.wou.edu/~mockc

(OFFICE HOURS)

	monday	tuesday	wednesday	thursday	friday
8:00 am	math 111 (foxtrot)	math 111 (foxtrot)	not usually on campus	math 111 (foxtrot)	math 111 (foxtrot)
9:00 am	math 111 (tango)	math 111 (tango)		math 111 (tango)	math 111 (tango)
10:00 am	office	office		office	office
11:00 am					
12:00 pm	math 70	math 70		math 70	math 70
1:00 pm	math 95	math 95		math 95	math 95
2:00 pm	office				
3:00 pm					

(I may, or may not, be present in my office during times that are not marked on the above chart)

(PREREQUISITES)

A grade of C- or better in math 95 or a satisfactory score on the WOU placement test. Official transcripts of high enough SAT or ACT scores on the math section are also acceptable.

(COURSE OBJECTIVES)

- Know a working definition of function.
- Be able to represent functions graphically, numerically (tables), symbolically (formulas), and verbally (words), and be able to readily switch between these representations for given functions.
- Understand and use the linear, polynomial, rational, exponential, logarithmic, and power families of functions.
- Model and solve problems involving those families of functions.
- Have a rudimentary understanding of the arithmetic of complex numbers.

(COURSE OBJECTIVES cont...)

- Know when inverse functions exist and if not, why not.
- Be able to compute and use inverse functions graphically, numerically, symbolically, and verbally.
- Symbolically fit linear and exponential functions to data.
- Fit all families of functions to data with regression.
- Have solidified his/her algebra and graphing skills.
- Have developed an appreciation of the power of mathematics to solve real-life problems.

(COURSE MATERIALS)

- Text: Algebra and Trigonometry, with modeling and visualization (5th Edition), by Gary Rockswold (ISBN: 978-0321900456 with MML / ISBN-13: 9780321826121 without MML bundle). You will also need access to the online homework, which is available through MyMathLab and requires an access code. You can attain these things two different ways:
 - i. You can purchase the book new from the bookstore, it is a bundle that includes an access code to MML – price is around \$250 +
 - ii. You can go to www.coursecompass.com and purchase the access code directly. Doing so will also give you an online version of the text – price is around \$100

>| *RELEVANT NOTE: for technical support on the MML website, please contact PEARSON at 800-667-6337* |<

- A Scientific calculator with at least the capabilities of a TI-83 is required. A TI-83 or 84 is highly recommended. **No TI-89, nor any other calculator with a computer algebra system, such as the TI-Nspire, is permissible for use in this course.**

(GRADE WEIGHTS)

Homework (W):	20.0%
Homework (O):	10.0%
Quizzes:	15.0%
Exam I:	17.5%
Exam II:	17.5%
Final exam:	20.0%
Total:	100.0%

F	0.00% - 59.9% or not passed skills test	C+	77.0% - 79.9%
D-	60.0% - 62.9%	B-	80.0% - 82.9%
D	63.0% - 66.9%	B	83.0% - 86.9%
D+	67.0% - 69.9%	B+	87.0% - 89.9%
C-	70.0% - 72.9%	A-	90.0% - 92.9%
C	73.0% - 76.9%	A	93.0% +

Special Grades

Incomplete grades may be assigned at the discretion of the instructor. An Incomplete can only be granted for a student who is passing a class and has a documented emergency that prevents them from completing a very small portion of the course (e.g. the final exam). A contract between the student and instructor for completion of the remaining course work is required.

Friday on the seventh week of class is the last day for dropping the course with a 'W' grade.

(HOMEWORK)

Homework is broken into two categories:

- i. Online homework, and
- ii. Written homework

Online homework

- Online homework will be assigned every day, and due the very next class day.
- Assignments will be relatively short (5 to 10 questions)
- Used as a learning guide (“help me solve this” and “view example” will be enabled)
- Worth 10% of overall grade
- Online homework grades itself based on accuracy (though, you’ll have unlimited attempts at all problems)
- Late homework accepted for half-credit

Written homework

- Written homework will be assigned every Monday, and be due the following Monday.
- The written assignment will span the chapter sections I plan on covering in that week (around 2 to 4 chapters worth of content)
- Worth 20% of overall grade
- Graded on two categories:
 - Completeness: 10 points (did you do the whole assignment?)
 - Correctness: 10 points (did you do a select amount of questions correctly?)
- Late homework will be accepted but only awarded completeness points

There is a certain level of organization that I expect from all of you for each written homework assignment. To be perfectly clear, the following style is required (not simply suggested) for written solutions:

- **Your handwriting must be completely legible**
- In the upper-right corner of each homework assignment, please write
 - Your name
 - Course section time or name (9:00 / “tango”)
 - Section number (ex: section 4.1)
- The title of your assignment should be the page # and problems that you will complete
- Each problem is ordered numerically, and each solution is bordered with a circle or box.

If the above is not met, you will see reduction in completeness points. Or, if it’s really unorganized, I may have you redo the assignment.

(QUIZZES)

My goal this term is to give quizzes every Friday of non-exam weeks at the end of class. These quizzes, while part of your grade, are in place to help you prepare for upcoming chapter exams, and also help me get a sense for how the class is performing as a whole. They will be given roughly 10-15 minutes before class ends. Each quiz will have anywhere from 2 to 4 questions based around your assignments for that week.

(SKILLS TEST)

The Mathematics Department has stipulated that a “Skills Test” for MTH 111 assessing competency in some basic pre-MTH 111 skills will be required. Each MTH 111 student must pass the Skills Test by the end of “Dead Week”. Any student not passing the Skills Test at least once by the deadline will receive an F in the course. This test **MUST** be passed with a score of at least 6/8 in order to pass the class.

The first skills test will be taken in class on Thursday of week I and retakes begin during week II. The retake skills tests will be administered at drop-in group sessions in MNB 110 at the following times each week:

Tuesday	11:00 am
Thursday	8:00 am
Friday	2:00 pm

The most important thing to keep in mind is that you are only allowed one retake per week until the end of dead week, which (if you’re on top of things) means you’ll have 10 total chances to take and pass the skills test. If you need to retake a skills test, simply show up to one of those time slots.

(EXAMS)

There will be two mid-terms throughout this course as well as a cumulative final exam. Each one will be based off of material that has been covered in lectures, homework problems, and in-class assignments. Attendance and completion of assignments are essential to being a successful test taker. Make-up exams are not allowed unless you have spoken with me beforehand and it is an unusual circumstance. On each exam (final included), you may use a single 3 x 5 note card (front and back).

Important note: the final exam *cannot* be taken at a different time. If it is physically impossible for you to make the time, then you must seek permission from the mathematics department. Please see me for details.

Projected Grade (PG:)

When I pass back an exam you will see two letter grades, one is the score you got on your exam; the second will always come after “PG:” and it represents the grade you will receive if you continue to perform at your current exam/quiz & homework level.

For example, let’s say you take the first exam and score a B, but you haven’t turned in a lot of your homework - you might see “PG: C-” at the top of your paper. What that means is this: if you continue to both perform at the B level on your exams and not turn in a lot of homework, you are on course to receiving a C- in the class.

In that sense, the projected grade is somewhat of a warning flag – it is telling you what grade you are currently projected to earn. With each exam you take, the closer your projected grade gets to becoming your actual grade in the course - your projected grade *approaches* your actual grade. So if you get your first exam back and it says “PG: D-” – don’t freak out – it’s projecting that you will perform at the level of the average of your current exams on every exam (including the final) for the rest of the term (which you can avoid by taking appropriate action).

(APPROPRIATE CLASSROOM BEHAVIOR)

You are ultimately responsible for your own attendance and performance. Disruptive classroom behavior of any kind, such as talking during lecture or consistently coming to class late etc., is not appropriate. This prescribed conduct for all students is described in the University Catalog. In particular, academic dishonesty of any kind will not be tolerated, and will be reported to the university. Also, leave your cell phone off or on silent when you come to class. They are not to be used at all during class. If for some reason you absolutely need to be contacted (in some emergency situation), inform me before class and an arrangement can be made.

(DISABILITY AND VETERAN SERVICES)

If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and the Office of Disability Services, APSC 405, or at 503-838-8250, as early as possible in the term. Students needing medical or mental health care can access the Student Health and Counseling Center by calling 503-838-8313, emailing at health@wou.edu, or by walking in to schedule an appointment.

Veterans and active military personnel with special circumstances are welcome and encouraged to communicate these, in advance if possible, to me.

(WOLF CONNECTION SYSTEM)

If the instructor determines your performance in this class is placing you at academic risk, you may be referred to a WOU student success specialist. He/she will offer to work with you to address issues and develop a student success strategy. Regardless of whether a referral has or has not been made, you are ultimately responsible for tracking your own progress in this course. If you would like to meet with a specialist regarding any academic struggles you are experiencing, please contact the Academic Advising and Learning Center at [503-838-8428](tel:503-838-8428).

(MATH CENTER)

The Math Center is a great place to go for additional help on concepts talked about in this course.. It is located in Hamersly Library room 228 (see picture below)

and will be available for drop in tutoring beginning week 2 and ending week 10. For addition information on the tutoring center and its hours, please visit

http://www.wou.edu/las/natsci_math/math/tutor/

(MY WEBSITE)

This section of the syllabus serves as advertisement for my personal website! There are lots of cool things to check on my website, including (but not limited to):

- My office hours
- The schedule of your math course (lets you know exactly what we will be learning on any given day)
- The current homework that is due the very next class day
- Tutoring center webpage
- Copy of this syllabus
- How to set up MyMathLab subscription
- Helpful links and videos to help with the learning of difficult topics
- Any handouts which were given in class (so you can print them if you missed a day)

Please make use of this website! I work hard on maintaining it, and I would hate for it to be a waste. I would say that the most notable thing about it is that it will show you day-by-day what we covered in class on any particular day. I will be updating it every morning with the current day's worth of information.

(NOTEWORTHY DATES)

- 9/29 – last day for online registration changes
- 9/30 – last day to drop with 100% refund
- 10/4 – Add/Drop fees begin
- 10/21 – last day to drop a class without responsibility for grade
- 11/11 – last day to drop a class with a W (withdraw) grade

(TIPS FOR SUCCESS)

So you might ask me “Mr. Mock, how can I be successful in this class?” Here are just a few tips:

- Show up to class – there are those who believe that showing up to class is optional...and I suppose that's true from the philosophical perspective of free will, but if you don't show up to class, you may miss something important!
- Do the homework – contrary to popular belief, doing the homework actually *does* help students practice and learn the material.
- Ask questions – If there is something you don't understand or need more clarification on, ask me! You can ask during the lecture, come to my office hours, or even send me an email. As a general rule, you can assume that someone else in the class has that same question, so do not feel like you are wasting class time by asking!
- Go to the tutoring center – the students who work at the tutoring center are undergrad mathematics students, and are eager to help students in math 70, 95, 105, 111, and 112.
- Find a study buddy – hold each other accountable for finishing homework, find a time to meet up outside of class to work on the more difficult problems. It's a lot easier to find motivation when you have a partner.
- Remember why you are here – No doubt all of us are here for a reason. I understand that math 111 is a required course, and maybe not all of us enjoy being here, and at times it may be hard to find the resolve to do 25 math problems some nights for homework, but just remember your ultimate goal – be it nursing school, a business degree, or maybe even a mathematician – this class is en route to your bachelors.

- CHECK MY WEBSITE!!!!!!!!!! – look at the course schedule, know what upcoming chapters are and read them beforehand. Know what I will teach before I actually teach it!
- Check your WOU email regularly. If I have something to announce outside of class, it will be through email. I would say I do this often – usually it's to announce if something unexpected happens and I need to cancel class, or maybe to send an attachment (such as answer keys to a in class review), etc...
- Take practice exams – test anxiety is very real for a lot of students in a math course. One thing you can do to prepare for your exam is to pick 15 or 20 problems from your homework or notes and try to do them all in 50 minutes. If you get stuck at some point or run out of time, that may give you a good indication of how ready you are for your actual exam; and it may also give you insight on what kinds of things you should include on your note card. There is a way to lessen the pressure of timed exams: practice with a time limit.
- Don't "week 9" me.... A lot of students approach me at the end of the term with excuses on why their attendance has been poor or why their exam scores have been low and they always ask: "Is there anything I can do to pass this course." So instead I will take the liberty to answer that question right now: There's nothing you can do at week 9 that can make up for a whole term of absences and poor exam scores. If you find yourself falling behind at like week 4, come see me! Don't wait!
- Don't give up – a lot of students struggle with mathematics; and sometimes you will want to throw your book across the room in anger and frustration – and that's okay. But after you've whispered curse words under your breath at the creation of mathematics, take a deep breath. Go over to your book and pick it up and try doing the problems again! Challenging yourself is a good thing!

[math 111 schedule]

(FALL TERM 2016)

	monday	tuesday	wednesday	thursday	friday
week I (sept. 26 – 30)	Syllabus +interval notation +inc/dec	difference quotient +piecewise		finish piecewise +quadratics	[skills test]
week II (oct. 3 – 7)	lose ends on review stuff	section 4.1 (extrema)		section 4.2 (end behavior)	section 4.3 (poly div.) +quiz
week III (oct. 10 – 14)	section 4.4 (real zeros)	section 4.4 (real zeros)		section 4.4 (in-class work)	section 4.5 (FTA) +quiz
week IV (oct. 17 – 21)	section 4.5 (FTA)	section 4.5 (in-class work)		section 4.6 (rational f(x))	section 4.6 (rational f(x)) +quiz
week V (oct. 24 – 28)	section 4.7 (polynomial inequalities)	section 4.7 (polynomial inequalities)		section 4.8 (powers of x)	review +quiz
week VI (oct. 31 – nov. 4)	EXAM I	section 5.1 (composition)		section 5.2 (inverse f(x))	section 5.2 (inverse f(x))
week VII (nov. 7 – 11)	section 5.3 (exp f(x))	section 5.3 (exp f(x))		section 5.3 (in-class work)	section 5.4 (log f(x)) +quiz
week VIII (nov. 14 – 18)	section 5.4 (log f(x))	section 5.4 (in-class work)		section 5.5 (LOLs)	section 5.6 (exp/log eqs.) +quiz
week IX (nov. 21 – 25)	section 5.6 (exp/log eqs.)	section 5.7 (exp/log eqs.)		[THANKSGIVING BREAK]	
week X (nov. 28 – dec. 2)	section 3.5 (transforms)	review		EXAM II	review for final
finals week (dec. 5 – 9)	FINAL EXAM
