Colleagues - I checked the terminal server situation, it indeed is updated and provides another method of accessing the software remotely.

See attached for instructions on remote login to TS1.WOU.EDU

The server has ArcGIS 10.1 software installed. Go to Start-All Programs-ArcGIS on the pull down menu

We now have three methods for accessing the software:

- (1) on the lab machines in NS216 and NS218
- (2) from your own computer using the ESRI student 1-year license software
- (3) using the WOU terminal server system.

We'll start launching some software tricks next week. If you're planning ahead / would like to work ahead, we will start working on Price Chapter 1 Tutorials next week. Next Monday's assignment will be read p. 9-23, Answer chapter review questions (p. 24) 1, 2, 3, 6; work through Mastering Skills Tutorial p. 25-39 answering all the embedded questions, complete exercises 1-6 and 10 on p. 40.

s.t.
