

Read lab manual Chapter 15 Coasts; define the following terms or answer questions.
Use internet search tools as needed.

Lab 10: Coastal Processes and Landforms

10-1. Define the following coastal terms (**use sketches where appropriate**).

A. Coastal Erosion

B. Estuary

C. Tidal Flat

D. Barrier Island

E. Sea Stack

F. Storm Surge

10-2. List three landform features that are evidence for a submergent and emergent coastline:

Submergent Coast

Emergent Coast

10-3. Discuss some of the ramifications for coastal areas as related to "global warming".
