ES302 Quantitative Methods Spring 2023 Quiz 2 Study Guide

Quiz 2 will be available on Thursday May 11 between 8 AM and 11 PM, with a 1-hour time limit once the exam is opened. The quiz format will be a combination of short-answer terminology and lab-style quantitative problems. Labs have largely focused on the basics of unit conversion, applied algebraic problem solving, and map work (scaling, location, direction, elevation, contouring, digital elevation models). Be prepared to make sketches of diagrams and recall key equations to illustrate your answers.

I would spend a minimum of studying 3-4 hours total for this exam, to assure maximum success. Use the keyword and concept list below as a check list for studying.

Class Notes and Readings to Review:

Introductory Math and Algebra Review https://people.wou.edu/~taylors/g302/mathrev.pdf
Guidelines for Problem Solving https://people.wou.edu/~taylors/g302/steps_in_problem_solving.pdf
Intro Dimensional Analysis https://people.wou.edu/~taylors/g302/units_conversion_rules_schoenfeld.pdf
Waltham Chapter 1 Solving Geologic Problems https://people.wou.edu/~taylors/g302/waltham1.pdf
Intro to Geologic Thinking https://people.wou.edu/~taylors/g302/AGI_Lab_Manual_Intro_Methods.pdf
Notes: Review of Maps / Topographic Maps https://people.wou.edu/~taylors/g302/maps.pdf
Reading: Topo Maps https://people.wou.edu/~taylors/g302/9_AGI_lab_manual_lab9_Topo_Maps.pdf
Waltham Ch. 2 Geologic Variables https://people.wou.edu/~taylors/g302/waltham2.pdf
Waltham Ch. 3 Equation Manipulation https://people.wou.edu/~taylors/g302/waltham_chap3.pdf
~~Contouring Techniques https://people.wou.edu/~taylors/g302/Contouring_Techniques.pdf~~
~~Digital Elevation Models https://people.wou.edu/~taylors/g302/Intro_DEM.pdf~~

Key Words from Notes, Video Exercises and Readings

Introductory Math and Algebra Review
https://people.wou.edu/~taylors/g302/mathrev.pdf
decimal system
decimal fractions
scientific notation
powers of 10
metric vs. English system
metric prefixes
- Peta
- Tera
- Giga
- Mega
- Kilo
- Hecto
- Deka
- Deci
- Centi
- Milli
- Micro
- Nanno
- Pica

Length: Meters
Area: Acre, Hectare
Volume: m^3, cm^3 ft^3 gallons
Mass: gram, kg, tonne
Temerature: oF oC
Dimensional Analysis:
- Distance
- Mass
- Time
- Area
- Volume
- Velocity
- Acceleration
- Force
- Energy

Empirical equations
Significant figures
Unit algebra
Unit cancellation
Rules of exponents
Graphic visualization
Line Slope
Equation of Line
Y intersect

Guidelines for Problem Solving
https://people.wou.edu/~taylors/g302/steps_in_problem_solving.pdf
Six Steps:
1. Read
2. ID variables
3. Draw and sketch
4. Convert units
5. Rearrange, solve
6. Check your answer

Intro Dimensional Analysis
https://people.wou.edu/~taylors/g302/units_conversion_rules_schoenfeld.pdf
System International SI Units
Metric measure
Length, mass, time
Velocity, acceleration, area, density
Dimensional analysis: unit balancing and cancellation
Powers of 10
Orders of magnitude

Waltham Chapter 1 Solving Geologic Problems
https://people.wou.edu/~taylors/g302/waltham1.pdf
qualitative vs. quantitative problem solving
sedimentation rate
constants vs. variables
proportions and ratios
Geologic Age-Depth Relations
Greek symbology
Δ = "delta" change in variable over time
Superscripts, subscripts
Exponents
Scientific notation
Powers of 10
Orders of magnitude
Metric SI system of measurement
Decimal fractions
Unit conversion

Intro to Geologic Thinking
https://people.wou.edu/~taylors/g302/AGI_Lab_Manual_Intro_Methods.pdf
Geologic Record
Geologic Time
Scaling
Spatial Scales
Bar scale
Fractional scale
Ratio Scale
Graphical scale
Global-Regional-Local Scale
Microscopic Scale
Megascopic Scale
Macroscopic Scale
Geologic Time Scale
~~Hypothesis Testing~~
~~Scientific Method~~
~~Multiple Working Hypothesis~~
~~Geosphere~~
~~Hydrosphere~~
~~Biosphere~~
~~Atmosphere~~
~~Magnetosphere~~
~~Heat Energy~~
~~EM Energy~~
~~Potential Energy (gravity)~~
~~Kinetic Energy~~
~~Mechanical Energy~~
~~Chemical Energy~~
~~Electrical Energy~~
~~Energy vs. Force~~
~~Cycles of Time and Mass~~
~~Orders of magnitude~~
~~Scientific notation~~
SI Measurement System
Linear Measurement
Area-Volume
Mass
Time vs. Rates
Unit Conversion
Density
Graphs
- Line X-Y
- Bar Graph
- Scatter Graph

~~Gravity-Density-Isostasy~~

~~Topography~~
~~Hypsometric Curve~~

Review of Topographic Maps
https://people.wou.edu/~taylors/g302/maps.pdf
topographic maps
north arrow
magnetic declination
map scale
fractional scale
graphical scale
longitude, latitude
degrees-minutes-seconds
township-range-section
equator
prime meridian
parallels
angular measurement
7.5 min quadrangle
contour interval
index contour
law of V's / streams
~~air photos~~
~~stereovision~~
~~map projection~~
~~DEM, Grid~~

Overview of Topo Maps
https://people.wou.edu/~taylors/g302/9_AGI_lab_manual_lab9_Topo_Maps.pdf
Map
Topographic map
Quandrangle map
7.5-minute quadrangles
Latitude-longitude
Degrees-minutes-seconds
Map scale
Ratio vs. graphical scales
Verbal scale
Compass bearings
Magnetic declination
Azimuth vs. Quadrant Bearing
UTM Location System
Township-Range System
Map symbols
North arrow
Map title
GPS, Global Positioning
~~Triangulation~~
~~Public Land Survey System~~
Aerial Photographs
Stereograms
~~Orthoimages~~
Contour lines
Index Contour
Contour Interval
Elevation
Depressions
Ridges and valleys
Spot elevations
Benchmarks (BM)
Rules for Contouring
Relief and Gradient
Topographic profile

Waltham Ch. 2 Geologic Variables
https://people.wou.edu/~taylors/g302/waltham2.pdf

geologic rates and functions
linear relationships
equation of a line
Y = mX + B
Y-intercept
Slope of line (rise / run)
Equation variables
ΔX and ΔY
Quadratic Equation
Polynomial Functions
Exponents and powers
Positive vs. negative powers
Fractional powers
Square root
Exponential functions
~~Logarithmic functions~~
~~Logarithms~~
~~Uses of Log Functions~~
1. ~~Rearrange exponential equations~~
2. ~~Reduce exponential functions to straight lines~~
3. ~~Compress and transform large data set~~

~~Log base 10~~
~~Log base 2~~

Waltham Ch. 3 Equation Manipulation
https://people.wou.edu/~taylors/g302/waltham_chap3.pdf
equation manipulation
solving for unknown variables
combining and simplifying equations
cancelling variables
variable substitutions
order of operations: brackets and braces
factorial vs. distributive property
rearranging equations

~~Contouring Techniques~~
~~https://people.wou.edu/~taylors/g302/Contouring_Techniques.pdf~~
~~contour lines~~
~~isopach lines~~
~~isochre lines~~
~~isobar lines~~
~~isotherm lines~~
~~isolith lines~~
~~structure contour lines~~
~~3-D visualization~~
~~Subsurface mapping~~
~~Dipping surfaces~~
~~Rules of contour lines~~
1. ~~Cannot cross~~
2. ~~Can merge~~
3. ~~Cannot split~~
4. ~~Can close~~
5. ~~Can end at edge of map~~

~~Elevation Datum = sea level~~
~~Contour interval~~
~~Index contour~~
~~Map scale~~
~~Hachured lines~~
~~Control Points~~
~~Parallel contour patterns~~
~~Mechanical vs. digital contouring~~
~~Interpretive contouring~~
~~Computer modeling~~
~~Gridding~~
~~Triangulation~~
~~Delaunay triangles~~

~~Nearest neighbor analysis~~
~~Grid nodes~~
~~Estimated fit~~
~~Triangulation~~
~~Surface stacking~~

~~Digital Elevation Models~~
~~https://people.wou.edu/~taylors/g302/Intro_DEM.pdf~~
~~Terrain Modeling~~
~~Digital Elevation Model DEM~~
~~Digital Terrain Model DTM~~
~~Grid pattnerns~~
~~Data capture~~
~~Visualization~~
~~Grid resolution~~
~~Elevation point data~~
~~Contour maps~~
~~Remote Sensing~~
~~DEM Interpolation~~
~~Triangulation -TIN~~
~~Data filtering, processing~~
~~Sinks and Pits~~
~~Shaded relief map~~
~~Slope map~~
~~Aspect map~~
~~Profile curvature~~
~~Elevation and vertical precision~~

WOU Groundwater Lab
Fieldtrip
Topographic map
Location map
Lidar Hillshade Model
Soil Survey
Geologic Map
Well Log
Groundwater
Groundwater Contour lines
Groundwater flow
Monitoring Well
Soil Sample
Drilling Log
SPT Penetration Test
Blow Counts
Mud Rotary Drilling
Riser Pipe
Well Screen
Well Assembly

Possible short answer essay questions and problem solving concepts

- What is the difference between a dimensionally balanced analytical equation and an empirical equation?
- What is the difference between the SI system of measurement and English system
- What is unit algebra, and how is it used to solving equations?
- What are the basic concepts of physical measurement in nature: length, mass, time, temperature, area, volume, density, velocity, acceleration, force, energy
- ~~What is a DEM, how is it created.~~

Map reading, photo observation.
Can you conduct basic calculations of map scale, and unit conversions?
Can you draw a profile and make basic map observations? Can you read a topographic map?
Can you solve basic hydrology / watershed problems? Calculate slope and gradient.
Determine the equation for a line
Determine elevations from a map
Measure locations in Lat-Long and UTM
Measure bearings in the azimuth and quadrant systems
Can you draw contour lines from point data?
How do powers of 10 work in the metric system?
Can you draw a topographic profile?
Can you re-arrange an equation and solve for the unknown?
Can you read a problem and draw a sketch showing a visual representation?
Can you determine the scale of a map? Use a map scale to make measurements?

The quiz will include an open-book problem solving portion related to the lab exercises; review lab answer keys posted on class web site: https://people.wou.edu/~taylors/g302/ES302_home.html
