Monday Moodle Tips
****
Student logs

If you ever wonder how active students are on your Moodle site, you could take a look at the logs.

Here is how you look at logs for the entire course:
1) go to your course home page
2) on the left hand side, find "administration" block and then "course administration"
3) click on "reports," then you'll see you have 4 options you can choose from
4) click the first one "logs," then you can search by students, or by days or by activities. Everything you find here is at course level.

Here is how you look at logs for a particular activity:
1) click on the activity (such as a lesson)
2) on the left hand side "administration" block, click on "logs"
3) you could search by students or by days, everything you find here is the logs for this particular activity
