

This is a detailed topographic map of the Clear Creek Quadrangle in Oregon. The map features brown contour lines indicating elevation, with major contours every 40 feet. It shows several water bodies, including Clatsop Creek, Nehalem River, and various smaller creeks like Koster Creek and Weed Creek. A network of roads is depicted, ranging from primary highways to unimproved surfaces. The map also delineates state boundaries between Clatsop, Tillamook, and Washington counties, as well as forested areas like Clatsop State Forest and Tillamook State Forest. A grid system with coordinates is overlaid on the map. At the bottom, there are scale bars (in miles and kilometers), a north arrow, and a legend for road classifications. Text at the very bottom provides information about the map's production by the U.S. Geological Survey and its availability for sale.
